Imaging Summary

A lumbar spine X-ray performed on 2025-01-10 revealed mild degenerative disc disease at L4-L5. No signs of acute injury or abnormality were noted. Radiologist: Dr. S. Kumar.

Comprehensive Medical Record

Physician Note & Diagnosis Summary

The patient presented for a routine annual physical on March 22, 2025. He reports generally good health with occasional fatigue, but no acute concerns. Physical examination was unremarkable, and vital signs were within acceptable ranges. Laboratory evaluation showed elevated cholesterol, mild vitamin D deficiency, and stable hemoglobin A1C.

Diagnoses include:

- Essential hypertension, well-controlled with current medication.
- Hyperlipidemia requiring continued statin therapy.
- Mild vitamin D deficiency requiring supplementation.
- GERD with no acute symptoms.
- Seasonal allergies, well-managed with as-needed antihistamines.

Patient was advised to maintain current medication regimen, begin vitamin D supplementation, and improve lifestyle habits through regular physical activity and a heart-healthy diet. Follow-up lipid panel is scheduled in three months.
