Clinic: Arlington Health Partners
Weight: 144 lbs
Height: 5'7"
Blood Pressure: 116/74 mmHg

Physician Notes:

Rachel was seen today with complaints of bloating, abdominal discomfort, and irritable bowel syndrome. She reports symptoms persisting for the past month with no associated weight loss. Physical examination was benign with mild abdominal tenderness and no guarding. Based on her history and clinical presentation, the patient was diagnosed with irritable bowel syndrome. Recommended dietary modifications including low-FODMAP diet and increased fiber intake. Prescribed Dicyclomine 10mg up to four times daily as needed for abdominal cramping. Patient was advised to maintain a symptom diary and return in 4 weeks for follow-up.

Signed: Dr. J. White Date: 07/25/2025
